PROFESSIONAL SUMMARY

Experience developing web and mobile applications using technologies such as Java, Next.js, Flutter, and Node.js. Skills in analysis, programming, and database management, with knowledge of version control and team collaboration. Able to collaborate effectively in multidisciplinary teams, providing creative and innovative solutions to technological challenges. Passionate about starting his professional career as a junior software developer, applying his knowledge to real-world projects that generate value for organizations.

RELEVANT PROYECTS

- Chatbot for Tourism in Bolívar Colombia August 2025 – Currently
- Create an interactive chatbot to provide tourist information in Cartagena.
- Implement the Chatbot logic using the Gemini API and Flutter (Dart).
- Design the database in Node.js to store information about monuments and events.
- Promote a sustainable approach by reducing the need for printed guides and centralizing tourist information.
- Rick and Morty app
 April 2025 July 2025
- Develop a web application in React.js with Vite.js to display characters and locations from the series.
- Implement API requests with Axios and custom hooks for data management.
- Design interfaces using libraries such as Chakra UI and React Icons.
- Implement ID search logic, resident rendering, and detailed display of each character.
- Management System for Automotive Workshops February 2024 - June 2024
- Design a web application to manage the internal operations of automotive workshops.
- Develop business logic using PHP and MySQL as a database.
- Optimize SQL queries to improve system performance.
- Use Git and GitHub for version control and team code integration.
