PROFESSIONAL SUMMARY

Experience developing web and mobile applications using technologies such as Java, Next.js, Flutter, and Node.js. Skills in analysis, programming, and database management, with knowledge of version control and team collaboration. Able to collaborate effectively in multidisciplinary teams, providing creative and innovative solutions to technological challenges. Passionate about starting his professional career as a junior software developer, applying his knowledge to real-world projects that generate value for organizations.

RELEVANT PROYECTS

Chatbot for Tourism in Bolívar - Colombia

August 2025 – Currently

- Create an interactive chatbot to provide tourist information in Cartagena.
- Implement the Chatbot logic using the Gemini API and Flutter (Dart).
- Design the database in Node.js to store information about monuments and events.
- Promote a sustainable approach by reducing the need for printed guides and centralizing tourist information.

Rick and Morty app

April 2025 – July 2025

- Develop a web application in React.js with Vite.js to display characters and locations from the series.
- Implement API requests with Axios and custom hooks for data management.
- Design interfaces using libraries such as Chakra UI and React Icons.
- Implement ID search logic, resident rendering, and detailed display of each character.

Management System for Automotive Workshops

February 2024 - June 2024

- Design a web application to manage the internal operations of automotive workshops.
- Develop business logic using PHP and MySQL as a database.
- Optimize SQL queries to improve system performance.
- Use Git and GitHub for version control and team code integration.

LANGUAGES

Spanish – Native

English – Advanced (C1 Aptis)

EDUCATION

Bachelor's Degree in Systems Engineering

Fundación universitaria colombo internacional

February 2023 - Currently

Associate Degree in Information Systems and Software Development

Fundación universitaria colombo internacional

February 2020 – November 2022

WORK EXPERIENCE

❖ Developer

Fundación Universitaria Colombo Internacional (UNICOLOMBO) | Mar. 2021 – Jun. 2022

- I was part in the development of a web application for managing academic projects, using Java, PrimeFaces, and XHTML.
- Implemented version control with Git and GitHub, ensuring proper collaborative code integration.
- Contributed to the design and implementation of the front-end and back-end, applying best practices and agile methodologies.

❖ Sales Agent

Consumer Sales Services | Dic. 2022 – Nov. 2023

- Applied problem-solving and user-oriented techniques transferable to technical support.
- Achieved monthly sales targets, strengthening interpersonal and time management skills.
- Developed effective communication and customer service skills in English and Spanish.

CERTIFICATIONS AND COURSES

❖ Full Stack Web Development

Academlo | Sep. 2025

- During this specialization, I gained practical experience in Full Stack development using React and Next.js on the front end, and Node.js with Express on the back end. I learned to structure complete projects from interface design to API creation and consumption, managing databases and implementing version control with Git and GitHub.

❖ Supervised Machine Learning: Regression and Classification

Stanford Online (Coursera) | Mar. 2023

- This course, offered by Stanford Online through Coursera, allowed me to strengthen my knowledge in supervised machine learning, understanding the fundamentals of regression, classification and evaluation of predictive models.
- I learned to apply machine learning algorithms in real-world contexts, interpret performance metrics, and develop a deeper understanding of how AI models can support decision-making in software development and data analysis.
